Village is based on an innovative and unique business model that combines the planning and management of complex accommodation systems with a specific focus on the multicultural, relational and educational aspects. This is made possible due to the deep knowledge of community psychology and organizational skills of its staff as well as an innovative model of services, intended to cater to every athlete's needs.

Village creates temporary residential systems, guaranteeing participants the best living experience. Thanks to a hospitality model developed during the management of complex and important accommodation systems (e.g. Expo Village at Expo Milano 2015, home of 5000 delegates from 130 countries for a 10-month-period, and other various small and large sports events) it recognizes the importance of each guest, offering cultural mediation services to facilitate the cohabitation among different cultures.

Village has a long-established expertise in hospitality management for the youth and the organization of cultural and educational activities dedicated to them.

Village has three business divisions: Sport, Expo and Youth.
